

TwoNav Aventura

The new navigator includes revolutionary characteristics for this sector: An incredible autonomy of more than 20 hours, the possibility to navigate inside the city and in the mountains though the concept of "Dual" navigation and a compatibility with almost all the formats and brands.

More than a GPS

Barcelona, June 1st 2009. The Spanish company CompeGPS Team launches on the market TwoNav Aventura, the new navigator for all the Outdoor World's fans and professionals. The proprieties inserted in this new GPS represent a clearly evolution in the European navigators sector. TwoNav Aventura improves the quality of the Outdoor sports practice, thanks to its shock resistance, a capacity of facing all climatic conditions, a compatibility with numerous maps from all around the World even if it is from other brands, and an extraordinary autonomy of its battery combined with the possibility of adding AA piles to go even further.

Through its concept "Aventura without limit", the brand wishes to give his clients the opportunity to go wherever they want, converting the GPS into a really helpful device, clearing out the possible usual limitations. With TwoNav Aventura, it is now possible to enjoy every Outdoor activities from the beginning to the end though all its functions: from a quiet preparation of your trip at home, the On-road navigation to the spot, the following of the whole adventure and the posterior study of your activity with a bunch of useful data and graphics.

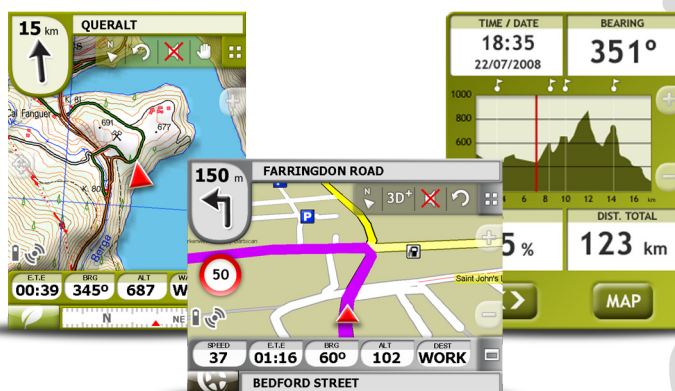

According to Pascal Darré, CompeGPS Marketing Manager, "the TwoNav Aventura launch was received with great expectation in the Outdoor world, as it comes from the latent market need to create a GPS that gives more tools to professional and Outdoor sports amateurs."

The best navigation assistance in any kind of situation
