

TwoNav iPhone/iPad/iPod Touch (universal application)

Here it comes! TwoNav version for iPhone/iPad/iPod Touch is now available through the iTunes Store. Let's transform your iPhone/iPad/iPod 3G/3GS or 4G into a professional Outdoor GPS to practice all your favourite activities. Unlock the Onroad mode buying an urban map (TeleAtlas map) and discover all the power of this application.

MAPS: online, offline, no limit

Unlimited and FREE Online MAPS included:

- Full coverage of Spain, France and Italy with topographic (1:25 000) and orthophotos (50cm/pixel).
- Full coverage of USA and Canada with topographic maps from MyTopo (enhanced and seamless version of USGS dataset, with US Forest Service updates, and the official DRCan maps).
- OpenStreetMap and OpenStreetMap Cycle Map worldwide coverage.
(To receive all these maps, take the option to download default data at first launch).

Load your OWN MAPS:

- Convert many map types and formats (.map, .jpg, .gif, .tif, etc) with our free CompeGPS Land PC version available at www.compegps.com.

A large portfolio of topographic maps for OFFLINE access:

- CompeGPS has the biggest topographic map portfolio from official mapping agencies: Spain (IGN), France (IGN), Germany (BKG), Finland, Switzerland, Netherlands, Belgium, Chile... all in the best scale available. The widest topographic map portfolio in the market!
- Download by tiles or zones (depending on the country) in www.compegps.com and use it in your iPhone offline.

MANAGE YOUR DATA: easy, powerful

- UNLIMITED tracks, routes and waypoints
- Create, edit and follow them directly on your iPhone
- Navigate North up or Track up to better fit your needs
- Compatibility with GPX, PLT format but also CompeGPS own format (size-efficient and feature-rich)
- FTP server included to download and upload your data into iPhone very easily and quickly.
(How to use FTP server?)

freedom to discover

TRACK YOUR PERFORMANCES

- Your altitude with the highest precision (sole application to apply geoid correction for better accuracy)
- Compass, altitude graph and data page
- More than 60 on-screen trip stats (speed, average speed, chronometer, estimated time and distance to destination, accumulated climb, maximum altitude, coordinates, sunset/sunrise time...)

DESIGNED FOR iPhone & iPad

Portrait or landscape

GPS Track recording with the screen off (up to 50% battery saving!)

IMPRESSIVE 3D VIEW

Incredible precision and fluidity

3D view for better orientation

(Note: for 3D you need the 3D relief file freely downloadable using our PC software CompeGPS Land (basic free vmode is enough) Land)

ONROAD NAVIGATION: 2 GPS in 1 (only maps for Europe available)

Buying a Tele Atlas Vmap in www.compegps.com website (check the catalogue) will allow you to activate the Onroad mode of TwoNav without software change (just putting the maps in maps folder). With all the classical GPS car navigator features, you will discover all the power of TwoNav's dual navigation. Main features (if unlocked):

- Turn-by-turn voice guidance
- Speed limit/camera alerts
- Search by address, map, history...
- Favorites manager
- Short recalculation time ...

Price:
